

Curriculum Vitae

Personal Data

Name: Oswald Budischewski
Year of birth: 1966
Education: Programming and computer sales engineering at Grone School, 1991 - 1993
Languages: German (native speaker), English (basic)

Occupational activity • SAP ABAP/4-Developer

IT experience

Since: • 1995
Hardware: • PC's
Networks: •
Operating systems: • Windows 95, NT 4.0, 2000
• OS/2
• DOS
Database systems: • Access
• DBase
Programming languages: • ABAP/4
• Visual Basic (incl. VBA)
• Java
• Visual Objects
• Clipper
• COBOL
Main focus of consulting: • SAP R/3 - Developing with ABAP/4
Special qualifying: • Developing BAPI's
• Batch-Input
• Developing Transactions
• RFC
• OLE
• IDoc / ALE
SAP Modules: • IS-U (Industry solution Utility)
• IS-H (Industry solution Health-care)
• PS (Project management)
• SD (Sales & distribution)
• FM (Finance management)
SAP Certification: •

Project experience

Industry: **Suppliers for car manufacturers**
Period: **09/2004 - 04/2005**
Function: Developer
Project task / Job specification: Development of migration programs in module PS

The target of the project was the migration of all project planning Data from a local PS system into an international PS system. The new international system integrates several national systems for controlling purposes. Therefore an interface for transmitting selective Data between the systems was developed from an other project team.

Additionally, for organizationally reasons, the project numbers should be recode to an other Project-ID in the local system before the project Data was transmitted to the new system (e.g. from 77-xxx-yyy to 12-xxx-yyy).

My tasks in the migration project was the development of the following programs:

- Recoding the Project-ID in the local system
- Export and Import of the standard Milestones
- Export and Import of the productive Milestones
- Export and Import of the productive Networks
- Export and Import of the confirmations
- Export and Import of the project structures
- Export and Import of the statistical key figures
- Export of the activity type plans
- Generating several database tables (incl. maintenance views) for variable recode selective Data (such as plant and company code) during the export for different clients.

Industry: **Energy supply**
Period: **01/2002 - 03/2005**
Function: Developer
Project task / Job specification: Development of interfaces between the CRM-System of TPS-Labs and IS-U.

- Programs to transmit business events from the CRM-System to IS-U (move-in, move-out, modifications of business partners, change in tariff, etc.)
- Interface for transfer Data from IS-U to the CRM-System
- Online-Interface for recording meter readings and changing business billing plans with RFC
- IDoc-based interface between IS-U and PEPS (a system for administration and route planning of device changing orders)
- Transaction for rapid input of disconnection orders (in ABAP Objects, incl. event handling)

Industry: **Health's care**
Period: **09/2001 - 12/2001**
Function: Developer
Project task / Job specification: Generating new reports, extending old reports, repairing reports in the module FM

Industry: **Health's care**
Period: **04/2001 - 12/2001**
Function: Developer
Project task / Job specification: Programming BAPI's (with methods for reading, creating, changing and deletion) for communication between IS-H and foreign systems.

- Case dependent procedures
- Case dependent diagnosis
- Move dependent procedures

Industry: **Health's care**
Period: **02/2001 - 04/2001**
Function: Developer
Project task / Job specification: Release upgrade 4.05B to 4.62C
Extending of IS-H*MED-Documents

- Analysis and documentation of customer programs for possible problems with release 4.62.
- Analysis and documentation of modifications to the standard programs
- Extending a document for data recordation.
- Acceptance test after release upgrade.
- Modification of standard programs.

Industry: **Construction**
Period: **01/2001**
Function: Developer
Project task / Job specification: Performance optimisation of reports and transactions

- Run time analysis, SQL-Trace
- Optimising the performance by creating indices and optimisation of source code.

Industry: **Cosmetic**
Period: **11/2000 - 12/2000**
Function: Developer
Project task / Job specification: Extending and debugging a customer-transaction.

- Adding dynpro fields
- Restricting value helps in depending of other dynpro fields.
- Debugging

Industry: **Optical goods**
Period: **01/2000 - 10/2000**
Function: Developer
Project task / Job specification: Bonus settlement in module SD.

- Old data migration with flat files and batch input.
- Creating an OLE-interface (reading invoices and transferring the data with OLE between SD and MS-Excel).
- Creating a RFC-interface (incl. a VBA-macro) for transfer business partner data to MS-Access.
- Reporting (writing several reports in module SD)
- Writing a transaction to manage all workflows of the bonus settlement in one transaction.

Industry: **Optical goods**
Period: **04/1995 - 12/1999**
Function: EDP-Employee
Project task / Job specification: Employee in EDP-Division of the 3rd-biggest manufacturer worldwide for optical lenses and glasses

- Administration of Exchange-, File-, and Fax-Servers
- Developing reports and programs
- Developing an „electronic price list“ for the customers
- User-Support
- Hard- and Software installations
- Operating a mainframe
